Introduction

The British Election Study 2019-2023 is managed via a consortium of the University of Manchester and the University of Oxford. The Scientific Leadership Team is comprised of Professor Ed Fieldhouse, Professor Jane Green, Professor Geoff Evans, Dr Jonathan Mellon and Dr Christopher Prosser. The team is supported by Dr Roosmarijn de Geus. The previous 2014-2019 British Election Study team was also led by Professor Hermann Schmitt and Professor Cees van der Eijk.

The 2019 results file comprises the 2019 election results for each constituency (winning party, vote share, number of votes, turnout, majority and changes in vote share since 2017), the 2017 election results for each constituency (winning party, vote share, number of votes, turnout, majority and changes in vote share since 2015), the 2015 election results for each constituency (winning party, vote share, number of votes, turnout, majority and changes in vote share since 2010), the 2010 results (winning party, vote share, number of votes, turnout and majority), and contextual information at the constituency level.

A full list of variables is given later in this codebook.

2016 EU Referendum

Estimates of constituency level results for the 2016 EU Referendum are included with the permission of Professor Chris Hanretty, who generated the estimates. Users of the EU Referendum data should cite the following article, which provides more information about how the estimates were made:

Chris Hanretty, 'Areal interpolation and the UK's referendum on EU membership,' *Journal Of Elections, Public Opinion And Parties*, Online Early Access, http://dx.doi.org/10.1080/17457289.2017.1287081

Contextual information

2011 Census information on total population, population density, and the proportion of the resident population falling into different categories of gender, age, household type, housing tenure, ethnicity, country of birth, passports held, English (or Welsh in Wales) spoken as a main language, religion, National Statistics Socio-economic Classification (NS-SeC), Economic activity, industrial sector, qualifications, health, and deprivation. Census information is taken from the House of Commons Library Census 2011 Constituency results.

Note that because the Scottish census is carried out separate to the census in England and Wales not all census information is available for Scottish constituencies.

Merging with other data

We provide two constituency identifiers that can be used to merge the data in the results file with other sources, including the BES survey data. *ONSConstID* is the Office for National Statistics geographic code for each constituency, and *pano* is the Press Association Constituency identifier.
